## **PREFACE**

The purpose of establishing Quarantine Stations is to prevent the entry of dangerous exotic diseases into the country through imported livestock and livestock products. Faster international trade and travel have increased the risk of introducing known and unknown transmissible diseases with potential for rapid spread and serious socio-economic and health consequences. Quarantine Services are essential to keep India free from many exotic diseases, and AQCS plays a vital role in maintaining this freedom. Many infectious livestock diseases are present in other countries but not in India. To prevent their entry, the Office of International Epizooties (O.I.E.), through its International Zoo Sanitary Code, classifies diseases into List A, List B, and List C according to severity and ease of transmission. Zoonotic diseases are also addressed under AQCS to protect human health.

Air travel has shortened journey times that once acted as natural barriers when transport was by sea. Even sea travel is now faster, reducing the chance of detecting infections during transit. Hence, an efficient Animal Quarantine Organization is needed to conduct checks at international airports, seaports, and land routes. Livestock may carry pathogens without clinical signs, so they must be quarantined for observation and testing before release. Similarly, livestock products must be technically checked before entry. AQCS also helps prevent illegal trade involving animal transplants and surgical material, and can support security agencies in addressing bioterrorism threats.

To address these concerns, the Government of India launched the “Animal Quarantine & Certification Services” (AQCS) scheme during the Fourth Five Year Plan (1969–70), establishing quarantine stations at Delhi, Chennai, Kolkata, and Mumbai, and later at Hyderabad and Bangalore. The programme also provides internationally acceptable certification for livestock and livestock products exported from India, ensuring compliance with the health requirements of importing countries and the International Zoo Sanitary Code.

## **VISION, MISSION, OBJECTIVES AND FUNCTIONS**

### **Vision**

- To prevent the entry of any exotic disease through international trade and travel into India and to ensure the health and safety of the animal and human life.

### **Mission**

- NATIONAL HEALTH SECURITY: Protection of Indian animal and human population from exotic diseases through effective check on import and to ensure qualitative export.

### **Objectives**

- To prevent the ingress of any Exotic Livestock Diseases into India through importation of livestock & livestock products as per the provisions of Livestock Importation Act.
- To act as Defence force against ingress of exotic disease of Veterinary importance by implementing the policies pertaining to import regulation, restriction, prohibition of the livestock and livestock Products, Biological and Micro- Organisms.
- To provide an internationally accepted certification service for augmenting export and to increase National income.
- To inspect and register the plants/mills exporting the animal by-products.

### **Functions**

- Implementation of the provisions of the Livestock Importation Act and Central Government orders in force on importation and exportation of livestock and livestock products.
- Detention, segregation, observation and testing of livestock and livestock products meant for import/export.
- Destruction and disposal of imported livestock and livestock products found infected and posing threat to the national health security.
- Pre-shipment Quality control to increase National exchequer.
- To have proper liaison with Custom authorities for effective and proper implementation of Livestock and Livestock Product Importation Act.
- To be in close association with the State Directors of Animal Husbandry regarding disease position and surveillance.

- To associate with the Heads of various recognized laboratories in India for getting expert opinion and for testing of materials.
- To supervise production and packing of LSP meant for export as per the specifications of the importing countries.
- Inspection and registration of plants/mills exporting the animal-by-products.

## **ECONOMIC IMPORTANCE OF ANIMAL QUARANTINE**

### **IMPORT:**

- Saving the huge money, labour and time required in disease eradication programmes (sometimes eradication not sure) by preventing the entry of exotic diseases.

### **EXPORT:**

- Important role in increasing the demand of LS/LSP in the international market by quality certification of livestock and livestock products as per the requirement of importing country and OIE procedures.

### **Categories of Livestock (LS) / Livestock products (LSP) for import purpose:**

- Requiring import license from DGFT. (Restricted items).
- Requiring Sanitary Import Permit (SIP) from DAHDF. (Free items).
- LS/LSP prohibited.

## **ACT & NOTIFICATIONS**

- 1898- 'Livestock Importation Act' was framed.
