### FSIS Letterhead Certificate for Poultry Products to India

Date Issued: \_\_\_\_\_ Certificate Number: \_\_\_\_\_

1. The poultry or poultry products were derived from birds which either:
  - A. For products not meeting the procedures outlined in the OIE Terrestrial Animal Health Code for the inactivation of the avian influenza viruses in meat:
    - i. have been kept in a U.S. county free from infection of highly pathogenic avian influenza and Newcastle Disease, as defined by OIE, in commercial poultry since they were hatched or for at least the past 21 days  
and
    - ii. have been slaughtered in an U.S. abattoir approved for poultry slaughter in a U.S. county free from infection of highly pathogenic avian influenza and Newcastle Disease, as defined by OIE, in commercial poultry and have been subjected to ante-mortem and post-mortem inspections and have been found free from any signs suggestive of avian influenza.
  - OR
  - B. In the case of processed poultry products, the procedures outlined in the OIE Terrestrial Animal Health Code for the inactivation of the avian influenza viruses in meat were met.
2. The poultry products were produced in accordance with the U.S. National Residue Program, which assures that the products do not contain harmful levels of veterinary drugs, pesticides, or environmental contaminants.
3. The poultry meat was derived from federally certified slaughter and processing facilities that adhere to the U.S. performance standards for *Salmonella*, which would include, in part, *Salmonella typhimurium*, *Salmonella enteritidis*, and *Salmonella typhi*, among other *Salmonella* species, which have been verified by FSIS through monitoring of the pathogen reduction and HACCP programs implemented in these facilities.

**EXPORT CERTIFICATE FOR  
ANIMAL PRODUCTS**

Port:

FOR OFFICIAL USE ONLY

Date:

Certificate Number:

This certificate is for veterinary purposes only. It is valid for 30 days after the date of signature (in the case of transport by ship or rail, the time is prolonged by the time of the voyage).

This is to certify that rinderpest, foot-and-mouth disease, classical swine fever, swine vesicular disease, African swine fever, and contagious bovine pleuropneumonia do not exist in the United States of America.

**ADDITIONAL DECLARATIONS**

The certified feathers:

1. originated from birds which were processed in countries free of high pathogenicity avian influenza in commercial poultry for 21 days prior to processing; or
2. have been processed to ensure the destruction of avian influenza virus using one of the following:
  - a. washed and steam-dried at 100°C for 30 minutes;
  - b. fumigation with formalin (10% formaldehyde) for 8 hours;
  - c. irradiation with a dose of 20 kilogray;
  - d. any equivalent treatment which has been demonstrated to inactivate avian influenza virus; and were not commingled after processing with potential sources of the avian influenza virus.

Certificate Number

**Certification Statements:**

Check box next to applicable commodity.

Hatching Eggs or Day-Old Poultry:

1. The flock or flocks and the hatchery or hatcheries from which the above-described hatching eggs or day-old chicks originated were inspected by me or another accredited veterinarian within 30 days prior to shipment of above hatching eggs or setting of eggs for above shipment of day-old chicks and found free from evidence of communicable diseases and insofar as can be determined have not been exposed to Newcastle disease, fowl plague, fowl typhoid, ornithosis, and pullorum disease.
2. During the usual routine inspection of the flock or flocks there was no visible evidence of communicable diseases observed on the following inspection dates: \_\_\_\_\_
3. The hatching eggs or day-old chicks were derived from parent flocks which had been kept for at least 21 days prior to export in counties free from highly pathogenic avian influenza (HPAI) and Newcastle disease (as defined by the Terrestrial Animal Health Code of the OIE) in commercial flocks.
4. The USDA accredited veterinarian has been advised that the hatching eggs must be sanitized and that the shipment must be made in new, clean containers.
5. The hatching eggs or day-old chicks were derived from parent flocks which participate in and comply with the biosecurity standards of the National Poultry Improvement Plan (NPIP).
6. The hatching eggs or day-old chicks were derived from parent flocks which are classified under the NPIP program as pullorum-typhoid clean and Mycoplasma gallisepticum clean.
7. If the parents of the G.P. stock (day-old poultry/hatching eggs) to be imported have been vaccinated against avian influenza, the same has to be indicated along with the name of the vaccine, manufacturer, date of manufacture, and the date of vaccination.
8. For day-old chickens only: The day-old chicks have been vaccinated against avian infectious bronchitis. The nature of the vaccine used and the date of vaccination is attached to this certificate: \*  
OR  
The day-old chicks have not been vaccinated against avian infectious bronchitis.\*
9. For day-old chickens only: The day-old chicks have been vaccinated against avian infectious laryngotracheitis. The nature of the vaccine used and the date of vaccination is attached to this certificate: \*  
OR  
The day-old chicks have not been vaccinated against avian infectious laryngotracheitis.\*
10. For chicken hatching eggs or day-old chickens only: The hatching eggs or day-old chicks come from parent flocks in which vaccination against avian infectious bronchitis is practiced: \*  
OR  
The hatching eggs or day-old chicks come from parent flocks in which vaccination against avian infectious bronchitis is not practiced.\*
11. For chicken hatching eggs or day-old chickens only: The hatching eggs or day-old chicks come from parent flocks in which vaccination against avian infectious laryngotracheitis is practiced: \*  
OR  
The hatching eggs or day-old chicks come from parent flocks in which vaccination against avian infectious laryngotracheitis is not practiced.\*

Live Poultry (other than hatching eggs or day-old poultry):

1. On this date all poultry described above, including all other poultry maintained in the flock, were inspected by me on the premises of origin within the past 30 days and found free from evidence of infectious and contagious diseases and insofar as can be determined have not been exposed to Newcastle disease, fowl plague, fowl typhoid, ornithosis and pullorum disease.
2. The poultry were kept for at least 21 days prior to export, or since hatching, in counties free from highly pathogenic avian influenza (HPAI) and Newcastle disease (as defined by the Terrestrial Animal Health Code of the OIE) in commercial flocks.
